U.S. Application No.: 09/674,377

Attorney Docket No.: Q61434

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

Claim 1. (previously presented): A neovascularization inhibitor comprising the

following polypeptide (a) or (b) as an active ingredient:

(a) a polypeptide having the amino acid sequence of SEQ ID NO: 1; or

(b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle

domains.

Claim 2. (previously presented): The neovascularization inhibitor according to

claim 1, comprising the polypeptide having the amino acid sequence of SEQ ID NO: 2, wherein

the polypeptide having the amino acid sequence of SEQ ID NO: 2 has at least one hairpin

domain and four Kringle domains.

Claim 3. (canceled).

Claim 4. (previously presented): The neovascularization inhibitor as set forth in

claim 1 or 2, wherein said polypeptide is obtainable by elastase digestion of human hepatocyte

growth factor harboring a deletion of amino acids 162-166.

U.S. Application No.: 09/674,377

Claim 5. (canceled).

Claim 6. (previously presented): A neovascularization inhibitor composition

Attorney Docket No.: Q61434

comprising the polypeptide having the amino acid sequence of SEQ ID NO: 2 and a

pharmaceutically acceptable carrier.

Claims 7-11. (canceled).

Claim 12. (previously presented): A method of inhibiting neovascularization which

comprises administering to a subject in need of such treatment a neovascularization inhibitor

composition comprising the following polypeptide (a) or (b) and a pharmaceutically acceptable

carrier:

(a) a polypeptide having the amino acid sequence of SEQ ID NO: 1; or

(b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle

domains.

Claim 13. (previously presented): A method of inhibiting neovascularization which

comprises administering to a subject in need of such treatment a neovascularization inhibitor

U.S. Application No.: 09/674,377

Attorney Docket No.: Q61434

composition comprising the following polypeptide (a) or (b) and a pharmaceutically acceptable

carrier:

(a) a polypeptide having the amino acid sequence of SEQ ID NO: 1; or

(b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle

domains.

Claim 14. (previously presented): A method for treating a disease associated with

abnormal angiopoiesis which comprises administering, to a subject in need of such treatment, a

neovascularization inhibitor composition comprising the following polypeptide (a) or (b) and a

pharmaceutically acceptable carrier:

(a) a polypeptide having the amino acid sequence of SEQ ID NO: 1; or

(b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle

domains.

Claim 15. (canceled).

Claim 16. (withdrawn-currently amended): The method of claim 14-or-15, wherein

said disease is any disease selected from the group consisting of rheumatoid arthritis, psoriasis,

Osler-Webber syndrome, myocardial angiopoiesis, telangiectasia, hemophilic joint, angiogenic

U.S. Application No.: 09/674,377

Attorney Docket No.: Q61434

diseases of the eye, angiofibroma, benign tumors, wound granulation, enteric adhesion, Crohn's disease, atherosclerosis, scleroderma and overcicatrization.

Claims 17-27. (Canceled)

Claim 28. (previously presented): A method for treating a solid cancer and/or cancer metastasis, which comprises administering to a subject in need of such treatment a pharmaceutical composition containing the following polypeptide (a) or (b):

- (a) a polypeptide having the amino acid sequence of SEQ ID NO 1; or
- (b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle domains.

Claim 29. (previously presented): A method for treating a solid cancer and/or cancer metastasis, which comprises administering to a subject in need of such treatment a pharmaceutical composition containing the polypeptide having the amino acid sequence of SEQ ID NO: 2.

Claim 30. (previously presented): The method as claimed in Claim 28 or Claim 29, wherein said subject has a lung cancer or mammary cancer.

AMENDMENT UNDER 37 C.F.R. § 1.114(c) Attorney Docket No.: Q61434

U.S. Application No.: 09/674,377

Claim 31. (previously presented): A method for inhibiting tumor growth or metastasis, which comprises administering to a subject in need of such treatment a pharmaceutical composition containing the following polypeptide (a) or (b):

- (a) a polypeptide having the amino acid sequence of SEQ ID NO: 1; or
- (b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle domains.

Claim 32. (currently amended): A method for inhibiting tumor growth-ormetastasis or metastasis, which comprises administering to a subject in need of such treatment a pharmaceutical composition containing the polypeptide having the amino acid sequence of SEQ ID NO: 2.

Claim 33. (previously presented): The method for inhibiting tumor growth or metatasis as claimed in Claim 31 or Claim 32, wherein the subject has lung cancer or mammary cancer.

Claim 34. (previously presented): A method for treating a disease arising from vascular hyperplasia and/or caused by an excessive or abnormal stimulation of the endothelial cells, which comprises administering to a subject in need of such treatment a pharmaceutical composition containing the following polypeptide (a) or (b):

AMENDMENT UNDER 37 C.F.R. § 1.114(c) Attorney Docket No.: Q61434

U.S. Application No.: 09/674,377

(a) a polypeptide having the amino acid sequence of SEQ ID NO: 1; or

(b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle

domains.

Claim 35. (previously presented): A method for treating a disease arising from

vascular hyperplasia or/and caused by an excessive or abnormal stimulation of the endothelial

cells, which comprises administering to a subject in need of such treatment a pharmaceutical

composition containing the polypeptide having the amino acid sequence of SEQ ID NO: 2.

Claim 36. (previously presented): The method of Claim 34 or Claim 35, wherein

said disease is a disease selected from the group consisting of rheumatoid arthritis, psoriasis,

Osler Webber syndrome, myocardial angiopoiesis, telangiectasia, hemophilic joint, angiogenic

diseases of the eyes, angiofibroma, benign tumors, hematopoietic malignancies, wound

granulation, enteric adhesion, Crohn's disease, atherosclerosis, scleroderma and over

cicatrization.

Claim 37. (Withdrawn-previously presented): A method for controlling conception

which comprises administering to a subject a pharmaceutical composition comprising the

following polypeptide (a) or (b):

(a) a polypeptide having the amino acid sequence of SEO ID NO: 1; or

U.S. Application No.: 09/674,377

(b) a polypeptide having the amino acid sequence of SEQ ID NO: 2;

wherein each of polypeptides (a) and (b) has at least one hairpin domain and four Kringle domains.

Attorney Docket No.: Q61434
